

FAASTeam presents:

Takeoff Briefings and the Go/No-Go Decision and FAA Changes

This program takes a hard look at the thought process of making a proper go/no-go decision and whether our industry has been laboring under some outdated thought. We start out by studying where we are today with our takeoff briefings, then discuss whether there might be some holes in our present theories. We use the FAA produced Takeoff Safety Training Aid to show data on how we are progressing (or not progressing). We then review the FlightSafety/Gulfstream partnership in rewriting the Aircraft Operating Manual to match the modern view based on modern data. We finish by stressing the importance of using the latest information to develop an SOP that best suits the culture of your flight department, and the importance of everyone operating from the same standard.

Directions: The Broadmoore
1 Lake Avenue Colorado Springs, CO 80906

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
